

# HTML & CSS Basics

## # HTML & CSS Basics

### ## 1. Introduction to HTML & CSS

HTML (HyperText Markup Language) structures a webpage, while CSS (Cascading Style Sheets) styles it.

Together, they form the foundation of web development.

### ## 2. HTML Basics

#### ### a) HTML Document Structure

```
```html
<!DOCTYPE html>

<html>

<head>
  <title>My First Web Page</title>
</head>

<body>
  <h1>Welcome to Web Development</h1>
  <p>This is a paragraph.</p>
</body>
</html>
```
```

#### ### b) Common HTML Tags

- **Headings**: `<h1>`, `<h2>`, `<h3>` ... `<h6>`
- **Paragraphs**: `<p>`
- **Links**: `<a href="https://example.com">Click Here</a>`
- **Images**: ``
- **Lists**:
  - Unordered: `<ul><li>Item</li></ul>`
  - Ordered: `<ol><li>Item</li></ol>`
- **Forms**: `<form>`, `<input>`, `<textarea>`, `<button>`

### ## 3. CSS Basics

### ### a) How to Apply CSS

#### 1. **Inline CSS**:

```
```html
<p style="color: blue;">This is a blue text.</p>
```
```

#### 2. **Internal CSS**:

```
```html
<style>
  p { color: red; }
</style>
```
```

#### 3. **External CSS**:

```
```css
/* style.css */
p { color: green; }
```

```html
<link rel="stylesheet" href="style.css">
```
```

### ### b) CSS Selectors

- **Element Selector**: `p { color: blue; }`
- **Class Selector**: `.class-name { font-size: 16px; }`
- **ID Selector**: `#id-name { background: yellow; }`

### ### c) Box Model

- **Margin** (outside spacing)
- **Border** (outline around an element)
- **Padding** (inside spacing)
- **Content** (text, images inside the box)

### ### d) CSS Layouts

- **Flexbox**: Used for flexible layouts.

```
```css
.container {
  display: flex;
  justify-content: center;
}
```

```
    align-items: center;
}
```

- Grid: For advanced layouts.
```css
.container {
    display: grid;
    grid-template-columns: 1fr 1fr;
}
```
```

### ### e) Responsive Design

- **Media Queries** adjust styles for different screen sizes.

```
```css
@media (max-width: 600px) {
    body { background-color: lightgray; }
}
```
```

## ## 4. Conclusion

HTML and CSS are the foundation of web development. Mastering them is essential for building beautiful and functional websites.
